

Compressed Paper Panels

Made from environmentally sustainable resources, primarily from paper purchased from managed forests throughout North America. The paper is treated with resin then pressed and baked to create solid sheets. Stain-, scratch-, and heat-resistant, this material has been used for aerospace tooling, marine fiberglass reinforcement and outdoor skate ramp surfaces with unquestioned durability.

Compressed Paper materials can be used alone or integrated into most of VGS' proprietary signage and fixture systems to create an attractive eco-friendly program. And, utilizing VGS MagaLens® system, updates are not only fast and easy but extend the lifecycle of your sign or display.

Depending on your green objectives, VGS will create an overall solution that is both earth friendly and makes good business sense.

Environmentally Conscious

Reusable Signs and Displays

Extend the lifecycle of your signage and displays with our exclusive MagaLens® system. Simply lift the durable Lexan® cover and install your printed graphic inserts in seconds. Designed for the digital age, VGS fixtures use plain paper inserts you can generate from conventional laser and inkjet printers. And with our Sign-O-Matic™ software, you can design and print your own inserts like a professional!
